### **ETL - BRIEF SUMMARY**

- Worked extensively for diverse teams and projects on Informatica – Source Analyzer, Data warehousing designer, Mapping Designer & Mapplet, and Transformations.
- Involved in the development of Informatica mappings, also tuned for better performance.
- Involved in designing the procedures for getting the data from all systems to Data Warehousing system. The data was standardized to store various Business Units in tables.
- Informatica mappings - PL/SQL procedures/functions to build business rules to load data.
- Used most of the transformations such as the Source qualifier, Aggregators, Connected & unconnected lookups, Filters & Sequence.
- Used ETL to load data from MS SQL Server 7.0, Oracle 8i, Sybase & flat files to DB2.
